Percentage	<input checked="" type="checkbox"/> Full time 100% <input type="checkbox"/> Part-time
Starting date	April/May 2020
Location	Lunaphore Technologies SA, EPFL Innovation Park, building A, CH-1015 Lausanne (VD)

Lunaphore Technologies is a life-sciences company delivering products based on a microfluidic technology to analyze tissue samples for cancer research and diagnostics. Lunaphore is seeking a highly motivated candidate to join our team and contribute directly to the development and growth of the company.

Summary

We are looking for a 'Product Owner' to develop and maintain product requirements based on user and market needs, as well as manage product lifecycle. The successful candidate, who will collaborate closely with R&D, sales and marketing teams, must have excellent understanding of the technology and applications, and be ready to join a hard-working team, passionate about taking Lunaphore to the next level.

Role/Responsibilities

- ✿ This position reports to the: Product Manager
- ✿ Understand in depth the market and user needs
- ✿ Gather and prioritize product and customer requirements
- ✿ Efficiently describe and communicate requirements for product development.
- ✿ Collaborate closely with development teams and represent the voice of customer.
- ✿ Develop detailed product roadmaps to align the teams and activities.
- ✿ Coordinate activities for product launches.
- ✿ Develop and update product documentation such as user manuals.
- ✿ Participate in user testing at customers
- ✿ Track and analyze the product's backlog.
- ✿ Create presentations and provide product training and material to the different company departments, especially commercial teams.
- ✿ Participate in market research, attend user meetings and scientific congresses.

- ❖ Drive for results by consistently achieving goals and pushing to complete tasks by their deadlines.

Required qualifications

- ❖ You have a scientific background: Master's degree in Life Sciences, Bioengineering or other similar background allowing you to easily understand the product's features and applications.
- ❖ You have experience with digital pathology, image analysis and/or microscopy.
- ❖ Experience in laboratory techniques, such as immunohistochemistry and immunofluorescence, is a plus.
- ❖ Experience in product management and/or product development is a strong plus.
- ❖ Experience with medical device regulations is a plus.

Required soft skills

- ❖ You show curiosity towards new technologies.
- ❖ You have the ability to adapt in a constantly changing environment.
- ❖ You have the ability to collaborate with others by working in a team, share information with peers and managers.
- ❖ You demonstrate critical thinking and analytical skills.
- ❖ You demonstrate good organizational skills, attention to detail and manage well timelines.
- ❖ Fluency in oral and written English is a must. Additional language skills including French and German are highly desired.

We offer

- ❖ A multidisciplinary industrial project within a young and strongly growing high-tech startup.
- ❖ An international working environment with high level of diversity and strong network.
- ❖ A highly interactive team with strong personal and technical qualities.
